PROJECTS

Student Management System - React.js

- I developed a Student Management System using React.js. It performs CRUD operations like adding, updating, deleting, and viewing student records. I used useState for state management and React Router for navigation between pages. The data is stored in localStorage so it remains persistent after refresh.

Beauty Studio Website – HTML, CSS, Bootstrap

- Designed and developed a responsive Beauty Studio website showcasing services, pricing, gallery, and contact information. Focused on attractive UI design and smooth user experience using Bootstrap components.

Flipkart Clone – HTML, CSS, Bootsrap, Javascript

- I developed a Flipkart Clone using HTML, CSS, and JavaScript. The project includes features like product listing, add to cart, remove from cart, quantity management, and dynamic price calculation. I used JavaScript array methods like map and reduce to render products and calculate totals.
